Experience

Flipp (digital shopping platform)

Lead Product Designer | 2023 – Present

- Leading the end-to-end design process for the Flipp app, from concept to final implementation.
- Conduct user testing and gather insights to inform design decisions to ensure a user focused approach.
- Leverage AI tools to rapidly produce wireframes, interactive prototypes, and high-fidelity designs.
- Collaborate closely with PMs and engineers to define requirements to turn designs into scalable solutions.
- Facilitate and lead meetings with cross-functional teams while encouraging collaboration and creativity to generate solutions and solve problems.
- Mentor and provide guidance to junior designers, fostering a collaborative and growth-oriented design culture.

LawLabs (real estate platform, startup, SaaS)

UX Design Lead | 2022 – 2023

- Led design on the core SaaS product and 2 other unreleased products in different stages of development.
- Worked cross-functionally with members of our R&D team (engineers, product managers, researchers, and designers) to collaborate and deliver new designs and research findings.
- Drove design output across a wide range of product initiatives and spearheaded an end-to-end iterative design process.
- Championed and iterated a new design system to help build and create more usable products.

InnoSoft Canada (recreation software, enterprise)

UX Design Lead | 2019 – 2022

- Successfully led and scaled a team of 3 designers and researchers across 5 products at various levels of development.
- Effectively collaborated with a tightly-knit team of engineers, product managers, researchers, and designers to build and ship solutions across 5 different products.
- Led research and design to launch a new 0-1 product, Fusion Play. A new intramural product with over 30k users and climbing.
- Elevated company UX maturity through engaging lunch & learns, imparting knowledge of our design system and industry best practices across the organization.
